

## NEW FOR 2017

- Extending our snowmaking program with the purchase of automated snowguns to enable us to make the most of every opportunity to make snow when temperatures permit.
- Installation of a Chademo fast charger responding to the rapidly increasing demand from clients testing electric vehicles.
- Continuation of our ongoing commitment to install safety barriers on our access road.
- Fine tuning the Nelson GPS tracking system which was successfully implemented in 2016, further improving safety across the Proving Ground.
- Further working with both NZ Government departments and private companies investigating the construction of an autonomous vehicle test facility.

SHPG is taking a major step towards using only renewable energy sources. Diesel generators which have previously been used for peak capacity electricity, will now only be used as emergency back up.

## 2017 BOOKINGS & CONTACT INFORMATION

If you are considering testing at SHPG in 2017, please contact us as soon as possible. We are already experiencing a high level of interest for test facilities.

We will be on a summer break from 23 December 2016 to 16 January 2017. Emails will be checked regularly during this time. For urgent enquiries, please contact Judy Thomas +64 21 766 921.

*SHPG would like to wish you all a Merry Christmas and a safe New Year*
